

AI generated image

Concept: YAP Graphic is center piece of the pin (one solid piece (?), AWG chickadee is a separate piece that looks like it is sitting on the YAP Graphic.

Use stained glass effects from the AI generated image and pull those colors/effect and use them in the arms of the YAP graphic instead of just solid yellow, green, red and blue.

Add a third piece that says:  
ARCTIC WINTER GAMES MAT-SU 2024  
Idea: Banner along the bottom?

AWG chickadee versions
